

Pradip Basnet

Data Science Enthusiast

Balaju , Kathmandu • 9817036614 • basnetpradip324@gmail.com

 @ www.linkedin.com/in/pradip-basnet-a5411131a  @ <https://github.com/pradipbanset>

I am currently pursuing a BSc (Hons) in Computer and Data Science at Sunway College Kathmandu, affiliated with Birmingham City University. With a strong passion for leveraging data to address complex challenges and uncover meaningful insights, I have developed proficiency in Python, R, SQL, Java, and data visualization. I am eager to apply my skills in real-world, data-driven environments, contribute to impactful projects, and continuously grow my expertise in AI and emerging technologies.

EXPERIENCE

ML intern

Wiseyak Inc.

Jan, 2025 - Jul, 2025

Gained practical experience with AI agents and API integration while exploring deep learning models and their applications in real-world projects.

EDUCATION

Bsc(Hons) Computer and Data Science

Kathmandu

Sunway College Kathmandu, affiliated with BCU University (3rd year)

Mar, 2023 - Present

Completed - Third Year

PROJECTS

llm-to-neo4j

An AI-powered agent that turns career queries into a Neo4j graph of roles, skills, and tools. Powered by Google Gemini + LangGraph.

<https://github.com/pradipbanset/llm-to-neo4j.git>

Tomato-lef-detection

A web application for detecting diseases in tomato leaves using a TinyVGG-based convolutional neural network. The backend is built with FastAPI, and the frontend UI is built with React. Both services are containerized with Docker for easy development and deployment.

<https://github.com/pradipbanset/Tomato-lef-detection.git>

Rental-Agreement-Checker

This application analyzes rental contracts to identify illegal clauses, unfair terms, and compliance issues across all Australian states (NSW, VIC, QLD, ACT, SA, WA, TAS, NT). Upload your rental agreement and get instant AI analysis with interactive chat support.

<https://github.com/pradipbanset/Rental-Agreement-Checker.git>

QLoRA-Fine-Tuning-of-Gemma-2B-on-English-Quotes-Dataset

This project demonstrates memory-efficient fine-tuning of Google's Gemma-2B language model using QLoRA (Quantized Low-Rank Adaptation). The pretrained model is first quantized to 4-bit precision using NF4 to significantly reduce GPU memory usage, while LoRA adapters are trained on top of the frozen base model for task adaptation. Fine-tuning is performed on the Abirate/english_quotes dataset using supervised fine-tuning, enabling the model to generate structured and stylistically coherent quotes. This approach achieves performance comparable to full fine-tuning while requiring only a fraction of the computational resources.

<https://github.com/pradipbanset/QLoRA-Fine-Tuning-of-Gemma-2B-on-English-Quotes-Dataset.git>

QLoRA-Fine-Tuning-TinyLlama

This repository demonstrates parameter-efficient fine-tuning (PEFT) of a TinyLlama 1.1B Chat model using QLoRA (4-bit quantization + LoRA). The goal is to fine-tune a chat-style LLM on limited GPU VRAM while keeping training practical and

affordable.
<https://github.com/pradipbanset/QLoRA-Fine-Tuning-TinyLlama.git>

ACHIEVEMENTS

AI Ideathon (winner) organized by Sunway College

TRAINING/CERTIFICATIONS

Associate Data Scientist	2024
<i>Datacamp</i>	
Supervised Learning with scikit-learn	2024
<i>Datacamp</i>	
Unsupervised Learning in Python	2024
<i>Datacamp</i>	
Enterprise Design Thinking - Team Essentials for AI	2023
<i>IBM</i>	
Getting Started with Enterprise Data Science	2023
<i>IBM</i>	

SKILLS

Technical Skills(Python, HTML, CSS, Pytorch, SQL, R-programming, Data analysis, Fastapi), Soft Skills (Critical Thinking, Communication, Presentation Skills, Hardworking, Time management)

LANGUAGE

Nepali,English
